

What are Always-Care ® Senior Care Management (SCM) Services ?

Briefly - It is “management” of the Client and the Health Care choices for him/her.

But it is more complicated, so Always-Care ® has perfected a focused program to directly **F A C E** the health care challenges of the older adult and their family, by using it's Senior Care Managers (Registered Nurses) to;

Facilitate Senior Care Solutions;

(Physician Recommendations, Treatment Plans, In-Home Care, Crisis Assistance)

Advocate for you/your family;

(With Your Providers, Your Privacy Rights, Your Personal Wishes & Life Style Desires)

Coordinate Care;

(Recommend Providers, Accompany as Necessary, Assist with Level of Care Transitions,)

Educate the Client/Family;

(Living with the Situation, Care-Giving Tips, Planning/Options/Implementations)

Our Program, consist of several levels/options of Senior Care Management Services.

They each start with a **FREE** personal consultation with one of our Senior Care Manager (RN's).

Next, if appropriate, ***the process will move to a In Person Always-Care ® SCM RN On-Site Visit for evaluation/assessment and information collection.*** Then SCM RN enters the assessed data into sophisticated software. ***It is not a medical diagnosis or treatment system,*** but is State Of The Art, continually updating and specifically designed to directly focus on the health care challenges of the older adult and their family. It will recommend services and options to fit the clients needs and desires. The Always-Care SCM RN will produce a written report /document to use as a guide for immediate and/or future care and services considerations. The SCM RN will discuss the plan and it's various available options and can work for Client/Family as needed/desired toward implementation of goals and objectives.

You are always free to choose any health care or service provider you wish. Many of the services/providers recommended/needed will not be available directly from Always Care, but the Always Care SCM RN will be able to refer and/or manage the total continuum of services as an on going Senior Care Management service.

If the SCM-RN identifies the need to use any services which are available directly from Always Care ® Nursing Service, such as In-Home, or In-Facility Care, and you elect to use any services provided by Always Care Nursing Service, an overall long term total savings may be realized.

At Always-Care ® we have our own In-House Certified* Professional Staff RN's;

- RN - CCC (Certified Case Manager), ● RN - CGCM - (Certified Geriatric Care Manager),
- RN - CRRN (Certified Rehabilitation Registered Nurse)

* What does “Certified” mean ? In this state there are no laws to prevent any person from calling themselves a Care/Case Manager, Geriatric Advisor, Senior Advisor, Health Care Consultant, or using some other Similar or Misleading term, to gain access to seniors. Many of them are just trying to sell other services such as financial planning or insurance services, for big commissions. However there are various - Nationally Recognized Professional Organizations - that Certify Care/Case Managers, Geriatric Care Managers, and Rehabilitation RN's who meet their credentialing criteria, for education and experience.

So **the bottom line** is --- if you don't know who to trust --- trust the one company – that has been locally owned and managed Since 1974, and has as it's mission statement;

“Taking Care Of Yours ... As If They Were Ours” ® Since 1974

Confused still !

We understand, which is why at *Always-Care* ® we sort it out for you!
